PROFILE

Berlin-based Web Developer with a background in science and research that drives my aptitude in solving problems quickly and efficiently. I leverage this experience to jump head-first into learning new technologies and concepts methodically and with great attention to detail.

WORK EXPERIENCE

Voluntary Software Engineer, ThoughtWorks (mTomady project), Berlin
Mar 2019 – present

- Working as part of the engineering team in a dynamic social start-up.
- Working with agile software development methodologies
- Had the opportunity to learn new technologies

Scientific Interface, ResearchGate, Berlin
Aug 2013 – Aug 2015

- Tasked with improving user experience through communicating user feedback to engineers
- Helped maintain an efficient and user-friendly UI with 10+ million users by testing and bug reporting
- Improvement of platform growth and user activity through research and data analysis
- Responsible for augmenting the skillset of the team by coaching new team members

EDUCATION

Web Development Program, 2018
CareerFoundry, Berlin

- A 6-month intensive course in Web App Development
- Created a demo [E-commerce site](#) using Ruby on Rails, JavaScript, jQuery, HTML5 and CSS3; learning the MVC paradigm, testing and caching along the way

M.Sc. Integrated Natural Resource Management, 2017
Humboldt-Universität zu Berlin

- A multi-disciplinary Masters degree utilising both quantitative and qualitative research
- Courses from a variety of fields such as Geographical Information Systems (GIS), Economic modelling and scientific data analysis

B.Sc. Ecological Science, 2010
University of Edinburgh
